Motivated and tech-savvy individual with skills in graphic design, short form video editing, and web development. Familiar with basic content creation and eager to learn, adapt, and master new skills.

Projects / Relevant Works

Graphic Design

- Created digital graphics, including posters, logos, and infographics for academic and personal projects.
- Focused on clean layouts and distinct color contrasts for visuals.

Video Editing

- Selected and clipped high value moments from long form content to short videos.
- Edited videos, utilizing internet humor and trends.

Web Development

- Designed website wireframes using Figma.
- Built and deployed full-stack websites.
- Tech stack: HTML, CSS, JavaScript, TypeScript, React, Python, Django

Community Workshop

- Assisted in making lesson plans tailored for young learners to teach basic English
- Created visual and interactive slides using Canva and MS PowerPoint
- Assisted in organizing workshop activities and supported students during lessons
- Taught students one-on-one about basic English
