Summary

Aspiring web developer with a background in building personal projects with React and Django and experience in deploying web applications. Eager to apply practical skills to real-world projects and grow in a collaborative development environment.

Experience

Hackathon Participant

March 2025

University of the Cordilleras

Baguio City, PH

- Built a summarizing web app called summarease using Gemini API for AI-powered text summarization.
- Developed the full stack independently, including frontend and backend logic using Node.js + Express.js.
- Collaborated on website designing decisions.

resumate – Resume builder

Personal Project

- A website to help users create their resumes easily from templates.
- Integrated Gemini AI to develop an AI powered interview simulator.
- Tech Stack: React, React Router, TailwindCSS, Django, Django REST Framework

Re:wear – Buy and sell marketplace

Personal Project

- Full-stack e-commerce web app for buying and selling secondhand goods.
- Tech Stack: Django, Django REST Framework, React, React router, Bootstrap, Supabase

tick – AI-Powered To-Do List

Personal Project

- A task management web app for creating, organizing, and tracking tasks with due dates.
- Allows users to generate tasks with AI from prompts.
